Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, D/M

DATE: 28 May 1958

FROM : Chief, M/FM

SUBJECT: ORR Participation in CSR Course

Reference: Ch/E Memorandum 22 May 1958

- 25X1X1 1. In the iron and steel and related minerals field [REDACTED] 25X1X1
[REDACTED] are important in direct ratio to the frequency, accuracy and scope of their coverage in each country. Thus, they are by far our most important source for East Germany in that they not only provide much data not otherwise available but also are generally more current than the open press. Examples of types of [REDACTED] 25X1A2g
25X1A2g [REDACTED] that have been particularly valuable are: [REDACTED] 25X1A2g
Metallurgical Production and Import Plan Fulfillment, [REDACTED] 25X1A2g
Planned and Achieved Steel Production, Import and Allocations, and series reports of the type of [REDACTED] et seq. giving the output by products of the Brandenburg Steel Plant.
- 25X1X4 2. [REDACTED] on the steel industry in all other Bloc countries is much less important simply because there is much less of it. However, even in the case of the USSR, which publishes more usable information on the industry than other Bloc countries, important gaps exist and [REDACTED] have been the sources of significant information on specific subjects. Most of these have been in the form of reports [REDACTED] 25X1A2g
25X1X6 [REDACTED] and have been concerned with trade as well as with technological subjects. 25X1X6
3. Since the referenced memorandum does not appear to solicit suggestions for an improvement in clandestine reporting, none are being offered.

[REDACTED] 25X1A9a
